COBA
africa

COBA's unique vision is to be a growing and caring organisation striving to achieve better results, year on year. We will achieve this by blending investment programs in all business activities, using modern equipment and systems with dedicated and highly competent people in all areas.

By working in partnership with our employees, customers and suppliers, we strive towards achieving world class leadership in Quality, Engineering, Design, Delivery, Service and Management of all products, coupled with the lowest cost achievable through never ending development and continuous improvement. To achieve this, we will ensure that activities will be conducted safely and do everything we can to ensure the continued health of our employees and customers. We will act responsibly in relation to the environment and will work towards the principles of sustainability.

Global Supply Chain

COBA Africa's key mission is to market and provide the most comprehensive range of high quality products using a unique blend of technical expertise and highly skilled service such that we completely fulfil our customers' buying experiences.

Supply Chain Solutions

With COBA sales offices and distribution facilities in Cape Town and Johannesburg, our business is strategically positioned to efficiently supply and support customers throughout South Africa, from the North West of the region to the Western Cape.

In Store Support

Our merchandising services take brand offerings to the next level, creating excitement around products, services and brands at store level. Our dedicated sales team is always available to support the sales and merchandising staff who 'make it happen' on the retail shop floor.

Matco is a leading brand in the matting category within the FMCG sector. Under the COBA 'umbrella', Matco continues to innovate the market, offering an unrivalled choice of matting and floor safety products for a diverse range of environments.

Ulti-Mat

MICROFIBRE
TECHNOLOGY

EXCELLENT
ABSORPTION

Washable microfiber doormat with super absorbency

- Exceptional multi-action entrance mat using hygienic microfiber technology.
- Superior 'brushing and wiping' with 'rapid dry' properties – even out performs cotton.
- Flexible, ultra-fine fibres (even finer than a human hair) provide deep-cleaning action on passing footwear.
- Effectively penetrates those hard to reach treads on footwear.
- Friction from the fibres generates a static charge that attracts and traps dust/debris.
- Filament structure creates a capillary effect for improved dirt retention/absorbency.
- Luxuriously soft pile that looks smart and will not lint.
- Environmentally-friendly – does not require chemical pre-treatment or washing detergents.

Microfibre with a rubber backing
Height 8mm | Grey or brown
400mm x 600mm | 450mm x 750mm

Brown SML MF050004 | LRG MF050005
Grey SML MF010004 | LRG MF010005

Useful Tips

You will get the best results when you have a combination of mats: one outdoors to scrape dirt off shoes, and another indoors to dry and absorb moisture.

Interior Range

100%
COTTON PILE

EXCELLENT
ABSORPTION

DirtBuster

A favourite for muddy shoes or paws

- 100% ultra-absorbent cotton pile surface effectively removes mud, water, oil and dirt from feet, wheels, and paws. Helps to prevent moisture and soil from destroying carpets.
- Machine washable, and can be tumble dried.
- Ideal for domestic and office use to protect floors.
- PVC Free Non slip heavy duty rubber backing.
- Non-Allergenic

100% Cotton with rubber backing
Height 4mm | Light Grey or Brown
500mm x 750mm

Light Grey DT020004
Brown DT050004

Useful Tips

Can also be pressure sprayed with a garden hose. Use the back of a broom to squeeze excess water out and shake it vigorously to raise the pile before air drying.

Entra-Clean HygienePlus doormat

The washable doormat that actively kills germs

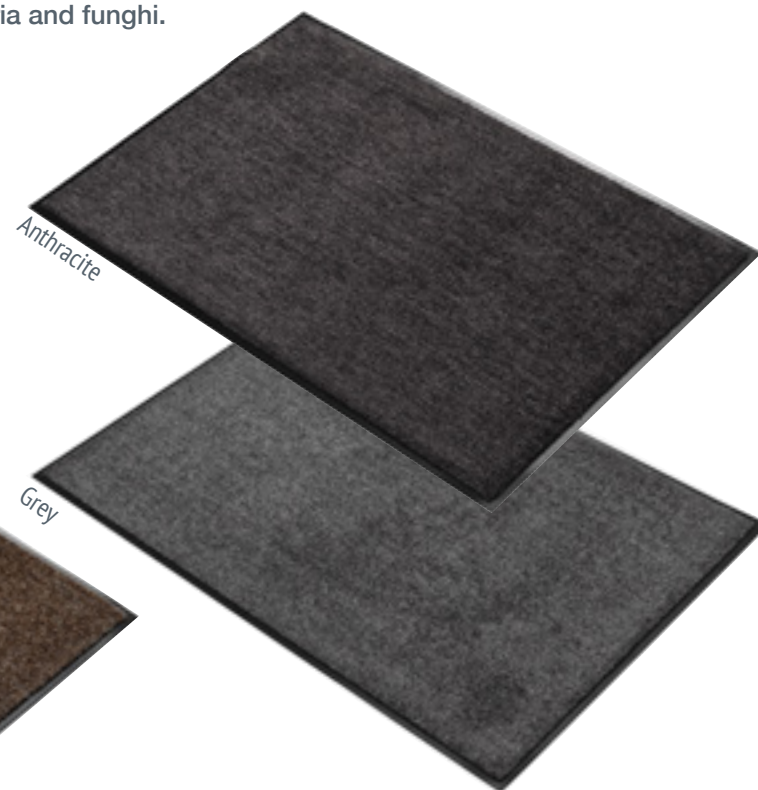

- Removes visible dirt and kills invisible microbes.
- HygienePlus means the mat is treated with the EU-registered biocide, BI-OME registered with OEKO-TEX® an antimicrobial and virus reducing technology. BI-OME works by effectively killing bacteria when contact is made with the mat.
- Although the treatment is a highly effective antimicrobial agent, it does not cause any skin irritations.
- A new concept in entrance matting.
- Improve floor level hygiene around your business – important whilst fighting Covid-19 and beyond.
- More sustainable – less frequent washing required, and on lower temperatures. Free of metals.
- Fully machine washable – with no reduction in active cleaning power for the life of the mat.
- Suitable for all facilities, in particular offices, hotels and leisure, retirement homes and healthcare settings.
- Reduces annoying odours caused by bacteria and fungi.

Slips in the WORKPLACE

Taking slips seriously

Slips in the workplace are a real concern. Globally they are one of the highest causes of accidents. It's not just sprains and bruises. Slips all too frequently result in bone fractures or internal injuries of one sort or another. In the most extreme cases, slips can result in fatalities. Slipping is especially dangerous if the individual falls onto a sharp or moving object, falls from height or comes into contact with hot surfaces or chemicals.

What are the causes?

Contaminants on floor surfaces are very often the culprit. This can be water, ice, oil, grease, chemical spillage, etc. It is not just spilt liquids that make floor surfaces dangerous. Swarf, powders and other dry debris can act like marbles on a floor surface. Uneven and poorly maintained floor surfaces can also cause both slips and trips.

What can be done?

Good house-keeping is essential and educating employees about risks is imperative. Ensuring that floors are regularly cleaned and maintained, so they are free of contaminants should help to reduce the risk of slipping significantly. There should be no trailing cables either. Floor safety should be evaluated frequently, with regular risk assessments. Carefully consider any risks and make sure you are compliant with South African health and safety legislation. Initiating preventative measures, such as the installation of anti-slip matting, flooring or coating can dramatically improve safety underfoot. Ensure the area is well lit.

Which sectors have the highest risks?

Healthcare & Social Care; Education; Food Retail; Food & Drink Manufacture; Catering & Hospitality; Manufacturing (General); Building & Plant Maintenance; Construction.

GripSafe

Anti-slip, protective liner

- Ideal non-slip liner for work benches, shelves, drawers and trays.

Black/Yellow | TP010702

HIGH EXPANSION AND CONTRACTION ABILITY

COBA Expansion Joints

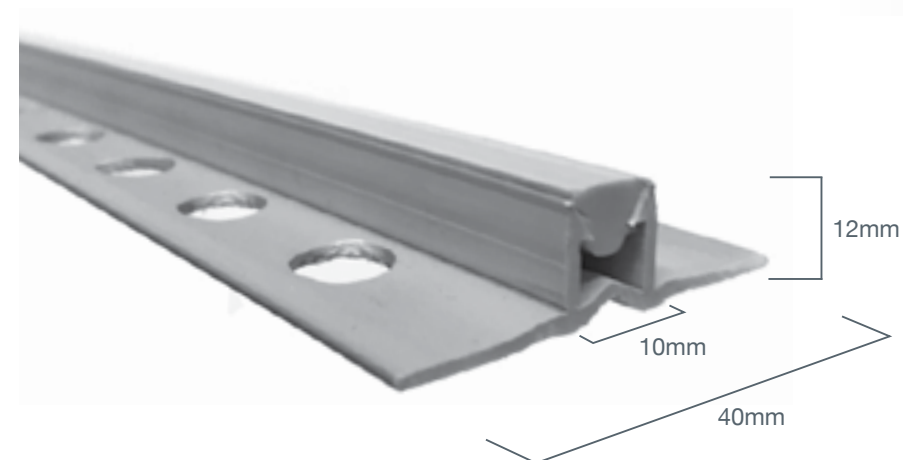

COBA expansion joints for use in the tiling of floors in a commercial or residential setting

- These joints are typically used when laying tile floors to accommodate the ongoing expansion/contraction of the tiles through temperature and moisture changes.
- The primary function of the joint is to prevent cracking and/or loss of adhesion to the screed between tiles.
- Our unique material formulation provides a cost-effective alternative to its aluminium counterpart without compromising on performance.

Produced with certified PP/LDPE material to provide better impact strength.
LDPE insert is renewable / removable if worn or damaged.
Custom/branded punch outs optional.
Can be made in any colour required.
Locally produced | Length: 2,5m.
